Ref: Seattle City Light RFP 42672
Lake Union Steam Plant
Fuel Oil PCB Clean Up

Dear Mr. Jones:

It is the present intention of the General Electric Company to develop a proposal in response to the Lake Union Steam Plant Fuel Oil Clean-up.

We respectfully request an extension of the bid due date from February 8, 1985 to April 8, 1985 for the following reasons:

1. From information received at the pre-bid tour on January 15, 1985 and other technical sources, the total representative chemical analysis of the oil is yet undefined. We received our first oil sample on January 29, 1985. Other representative sampling will be required before we can affirm the legally required method for disposal and the most economical approach.
2. We also need additional time to secure all the necessary permits.

We appreciate your consideration in this request.

Sincerely,

Mark R. List
